EDUCATION

• Madan Mohan Malaviya University of Technology, Gorakhpur

Bachelor of Technology (Electrical Engineering)

2023-2027

CGPA: 8.06/10.0 (Till 5th semester)

• Hallmark World School

Class XII, Central Board of Secondary Education

2023

Percentage: 86.6%

• Hallmark World School

Class X, Central Board of Secondary Education

2021

Percentage: 91.1%

EXPERIENCE

• Accenture

Associate Software Engineer (ASE) Intern (2 months)

May 2026-July 2026

Hyderabad

- Assisted in developing an enterprise-grade audit application in **C# using the .NET framework** for a major Fortune 500 energy sector client, contributing to real client deliverables in an **Agile team environment**.
- Engineered CI/CD pipeline improvements in Azure DevOps, cutting deployment time by 30% and streamlining the build, test and release cycles for a large-scale industrial application.
- Completed structured enterprise training in Generative AI, Agentic AI architectures, and enterprise cybersecurity, building applied knowledge of LLMs, prompt engineering, and AI agent design patterns.

• Indian Institute of Technology (IIT, BHU)

Summer Intern

May 2025 - June 2025

Varanasi

- Developed mathematical models of DC motor characteristics in MATLAB, simulating **speed vs. torque curves across 2 load conditions** and analyzing performance over a speed range of **0–1500 RPM** with approximately **92% model accuracy** against theoretical values.

PROJECT

• Smart Cab: Ride Sharing application

November 2025 - January 2026

- A distributed, real time ride sharing system with concurrent request handling, spatial indexing, and intelligent driver allocation.
- Architected a full-stack platform using MERN stack with decoupled backend services for auth, ride booking, and real-time tracking.
 - Implemented real time driver tracking using Socket.io with event driven non-blocking architecture, geohash based spatial indexing on Redis for O(1) proximity queries, and Dijkstra's algorithm for shortest path computation.
 - Implemented a min Heap driver ranking system scoring candidates by distance, rating and wait time.
 - Link: [GitHub](#) | [Live](#)

• Gym Buddy: AI powered fitness web application

July 2025 - October 2025

- Gym Buddy is a web-based fitness matching and planning platform that connects users with compatible workout partners.
- Engineered a full-stack fitness platform using MERN stack with JWT-based stateless authentication supporting concurrent multi-user sessions.
 - Integrated Gemini API to generate personalized diet plans via prompt engineered LLM calls, dynamically tailored to user fitness goals and dietary preferences.
 - Implemented gamification features including streak tracking, leaderboards, and reward systems to improve user engagement.

TECHNICAL SKILLS and INTERESTS

Languages: C, C++, Python, JavaScript

Developer Tools: Git, GitHub, VS Code, Docker, Azure DevOps

Frameworks: React.js, Node.js, Express, Socket.io, .NET

Cloud/Databases: GCP, MongoDB, Redis

Soft Skills: Leadership, Problem-solving

Coursework: Data Structure and Algorithms, Database Management System, Gen AI, Agentic AI

ACHIEVEMENTS

- Solved 200+ problems in [LeetCode](#).
- Completed 50+ skill badges in [Google Cloud Skill Boost](#).
